● Standard Grits
▲ Non Standard Grits

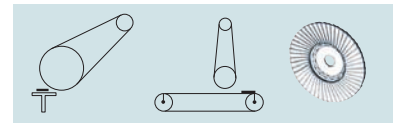

R145

- For flap wheels, narrow belts, and quick change discs
- Used for metal working applications

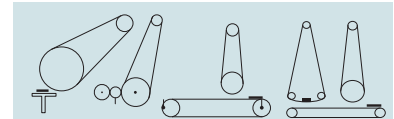

R155

- For flap discs and belt
- Used for all general metal working applications

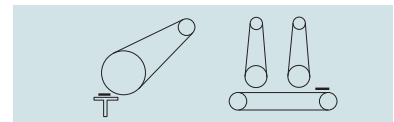

R192

- For stainless steel, tool steel, nickel alloy, etc
- Used to remove gates and risers from casting and for surface finishing

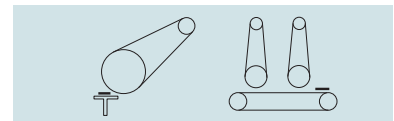

R355

- For aluminum, carbon steel, and stainless steel
- Wet and dry sanding
- Suitable for heavy duty applications
- Waterproof
- Less shelling provides longer product life

P365

- Mainly for P.C.B
- Also used for stainless steel and carbon steel
- Suitable for heavy duty applications
- Waterproof
- Wet and dry sanding
